Our world.

Balancing solidarity and resilience.

Economy | Society | Environment | Infrastructure

In our globalised world and in times of multiple crises, our planet, our society, our economy are facing unprecedented challenges. A paradigm shift is inevitable. In a world where until recently ongoing efficiency was the goal, the new era is about resilience and the postulate of solidarity.

At the MUNICIPAL SUMMER TALKS 2023 we want to find pathways to a sustainable future, initiate solutions and grasp opportunities. We will talk about politics with responsibility, sustainability in the economy and labour market, performance of society and infrastructure.

Among those joining us are i. a.
